No. 1 JANUARY 1976

Editorial Announcement 1

Guide for Authors 2

Nomenclature Policy: Generic Descriptors and Trivial Names for Vitamins and Related Compounds 8

Bacon Field Chow—A Biographical Sketch. *Robert A. Harte* 15

Intestinal Permeability to Large Particles in Normal and Protein-Deficient Adult Rats. *Bonnie S. Worthington and Jean Syrotuck* 20

Effect of Feeding Lysine and Threonine Fortified Bread During Gestation and Lactation on Growth of the Offspring in Rats. *G. Richard Jansen and H. Peter Chase* .. 33

Effect of Feeding Lysine and Threonine Fortified Bread During Gestation and Lactation on Growth of the Brain in Rats. *H. Peter Chase and G. Richard Jansen* 41

Some Factors Affecting the Nitrogen Sparing Action of Methionine and Threonine in Rats Fed a Protein Free Diet. *Hidehiko Yokogoshi and Akira Yoshida* 48

Relation of Ketosis to Metabolic Changes Induced by Acute Medium-Chain Triglyceride Feeding in Rats. *Yu-Yan Yeh and Paulus Zee* 58

Gluconeogenic Response to Mannoheptulose in the Rat. *George J. Klain, A. Wayne Meikle and Thomas P. O'Barr* 68

Relationship Between Hepatic Mitochondrial Oxidative Metabolism and Morphology During Riboflavin Deficiency and Recovery in Mice. *Charles L. Hoppel and Bernard Tandler* 73

Metabolic Changes in Golden Hamsters Fed Vitamin B-12-Deficient Diets. *Rose Y. L. Tseng, Ninea L. Cohen, Pilar S. Reyes and George M. Briggs* 77

A Possible Essential Role for Dietary Linolenic Acid in the Development of the Young Rat. *Maxwell S. Lamptey and Brian L. Walker* 86

Studies of the Effect of Dietary Cholesterol on Hepatic Protein Synthesis, Reduced Glutathione Levels and Serine Dehydratase Activity in the Rat. *S. D. Clarke, D. R. Romsos, A. C. Tsai, P. S. Belo, W. G. Bergen and G. A. Leveille* 94

Influence of Diet, Cortisol and Insulin on the Activity of Pyruvate Carboxylase and Phosphoenolpyruvate Carboxykinase in the Rat Liver. *Jean Peret and Marc Chanez* 103

Dietary Lysine and Carnitine: Relation to Growth and Fatty Livers in Rats. *Vichai Tanphaichitr, Mona S. Zaklama and Harry P. Broquist* 111

Influence of Certain Dietary Fibers on Serum and Tissue Cholesterol Levels in Rats. *Alan C. Tsai, Joel Elias, James J. Kelley, Ray-Shiang C. Lin and John R. K. Robson* 118

Relative Activity of α-Tocopherol and γ-Tocopherol in Preventing Oxidative Red Cell Hemolysis. *John G. Bieri, Ritva Poukka Evarts and John J. Gart* 124

Iron Absorption by Humans from Hemosiderin and Ferritin, Further Studies. *Carlos Martinez-Torres, Martha Renzi and Miguel Layrisse* 128

Stoppage of Glycogenesis and "Over-Shoot" of Induction of Lipogenesis and its Related Enzyme Activities in the Liver of Fasted Refed Rats. *M. L. W. Chang and M. A. Johnson* 136

No. 2 FEBRUARY 1976

Glucose Antimetabolites and Hunger. *Milan Rezek and Edwin A. Kroeger* 143

Efficiency of Phenylpyruvic and Phenyllactic Acids as Substitutes for Phenylalanine in the Diet of the Growing Rat. *Alan R. Gaby and Rajender K. Chawla* 158

Effect of Vitamin B-6 Deficiency on the Fatty Acid Composition of the Major Phospholipids in the Rat. *C. Bernard DeLorme and Paul J. Lupien* 169

Studies on the Changes in Reduced Glutathione of Chick Tissues During Onset and Regression of Nutritional Muscular Dystrophy. *S. J. Hull and M. L. Scott* 181

Maintenance Requirement and Energetic Efficiency of Lean and Obese Zucker Rats. *S. Deb, R. J. Martin and T. V. Hershberger* 191

Interactions of Trace Metals in Mouse and Rat Tissues; Zinc, Chromium, Copper and Manganese with 13 Other Elements. *Henry A. Schroeder and Alexis P. Nason* ... 198

Cellular Retinol-Binding Protein and Retinoic Acid-Binding Protein in Rat Testes: Effect of Retinol Depletion. *David E. Ong, Cheng-Hsein Tsai and Frank Chytil* .. 204

Nitrogen Retention in Men Fed Varying Levels of Amino Acids from Soy Protein with or without Added L-Methionine. *Allison Yates Zezulka and Doris Howes Calloway* 212

Lenticular Opacities in Young Rats as a Consequence of Maternal Diets Low in Tryptophan and/or Vitamin E. *George E. Bunce and John L. Hess* 222

Regulatory Role of Dietary Leucine on Plasma Branched Chain Amino Acid Levels in Young Men. *Leif Hambraeus, Christine Bilmazes, Christopher Dippel, Nevin Scrimshaw and Vernon R. Young* 230

Plasma Free Amino Acids of Children Consuming a Diet with Uneven Distribution of Protein Relative to Energy. *William C. MacLean, Jr., Robert P. Placko and George G. Graham* 241

The Effect of Dietary Vanadium on Fatty Acid and Cholesterol Synthesis and Turnover in the Chick. *Youssef Hafez and F. H. Kratzer* 249

Effect of Protein-Energy Nutrition on the Activity of Hepatic Microsomal Drug-Metabolizing Enzymes in Growing Rats. *J. W. T. Dickerson, T. K. Basu and D. V. Parke* 258

Biological Availability of Iron Supplements for Rats, Chicks and Humans. *M. D. Pennell, M. I. Davies, J. Rasper and I. Motzok* 265

Studies with Chicks on the Growth Depressing Factor(s) in Faba Beans (*Vicia faba* L. var. minor). *R. R. Marquardt, L. D. Campbell and T. Ward* 275

Dietary Fatty Acids and the Control of Glucose-6-Phosphate Dehydrogenase and Malic Enzyme in the Starved-Refed Rat. *Charlotte Slayton Nace and Bela Szepesi* 285

Studies of the Digestibility and Retention of Nitrogen and Amino Acids in Rats Fed Raw or Heated Soy Flour. *Zafrira Nitsan and Irwin E. Liener* 292

Enzymic Activities in the Pancreas, Digestive Tract and Feces of Rats Fed Raw or Heated Soy Flour. *Zafrira Nitsan and Irwin E. Liener* 300

No. 3 MARCH 1976

Editorial Paper: Balance Studies. *D. M. Hegsted* 307

Human Protein Deficiency: Results of a Nigerian Village Study. *Joseph C. Edozien, M. A. Rahim Khan and Carol I. Waslien* 312

Circadian and Menstrual Cycle Variation in Serum Ascorbic Acid Levels in Baboons. *Larry R. Boots, Phillip E. Cornwell and Lee R. Beck* 329

Concomitant Repression by Gluten of HMP Shunt Dehydrogenases, Citrate Cleavage Enzyme and Malic Enzyme in Rat Liver and Adipose Tissue. *Gaetano Livrea, Giovanni Carrozza, Luigi Manasseri and Ugo Muraca* 335

Effect of Early Protein-Energy Malnutrition and Environmental Changes on Cholinesterase Activity of Brain and Adrenal Glands of Rats. *Hae Sook Im, Richard H. Barnes and David A. Levitsky* 342

Protein Quality Evaluation of Low Glucosinolate-Low Erucic Acid Rapeseed and Unprocessed Faba Beans in Young Pigs. *Ghulam Sarwar and John P. Bowland* 350

Protein Quality of High Protein Wheats in Infants and Children. *William C. MacLean, Jr., Guillermo Lopez de Romaña and George G. Graham* 362

Creatine Metabolism in Men: Creatine Pool Size and Turnover in Relation to Creatine Intake. *Marilyn C. Crim, D. H. Calloway and Sheldon Margen* 371

The Effect of Formaldehyde on the Nutritive Value of Casein and Lactalbumin in the Diet of Rats. *Edwin L. Hove and Evelyn Lohrey* 382

The Effects of Saccharin on the Sucrose Consumption of Rats. *James J. Kenney and Richard Collier* 388

Adrenal Function in Young of Protein-Deprived Pregnant Rats. *Penny L. Parsons, Ruth E. Shrader and Frances J. Zeman* 392

Effect of Dietary Fats on Lipogenesis in Iron Deficiency Anemic Chicks and Rats. *Ezzat K. Amine, Elaine J. Desilets and D. M. Hegsted* 405

Choline Utilization in the Chick as Influenced by Levels of Dietary Protein and Methionine. *Bruce A. Molitoris and David H. Baker* 412

Uptake of Macromolecules by Enterocytes on Transposed and Isolated Piglet Small Intestine. *Harvey L. Leary, Jr. and James G. Lecce* 419

Effect of Oral Purines on Serum and Urinary Uric Acid of Normal, Hyperuricemic and Gouty Humans. *A. J. Clifford, J. A. Riumallo, V. R. Young and N. S. Scrimshaw* .. 428

Level of Purine in Food and Their Metabolic Effects in Rats. *Andrew J. Clifford and David L. Story* 435

Influence of Diet on Development of the Abdominal Fat Pad in the Pullet. *F. E. Pfaff, Jr. and R. E. Austic* 443

No. 4 APRIL 1976

Fluoride-Selenium Interaction in the Hard and Soft Tissues of the Rat. *Thomas R. Shearer and James W. Ridlington* 451

Studies on the 1α,25-Dihydroxycholecalciferol-Like Activity in a Calcinogenic Plant, *Cestrum diurnum*, in the Chick. *R. H. Wasserman, R. A. Corradino, L. Krook, M. R. Hughes and M. R. Haussler* 457

Hydrogen Production in the Rat Following Ingestion of Raffinose, Stachyose and Oligosaccharide-Free Bean Residues. *Joseph R. Wagner, Robert Becker, Michael R. Gumbmann and Alfred C. Olson* 466

Vitamin A Deficiency and the Metabolism of Glycosaminoglycans and Ascorbic Acid in the Rat. *M. Mohanram, R. B. Rucker, R. E. Hodges and D. Ney* 471

In Vivo Requirement for Silicon in Articular Cartilage and Connective Tissue Formation in the Chick. *Edith M. Carlisle* 478

In Vitro Uptake and Metabolism of Pteroylpolyglutamate By Rat Small Intestine. *Charles H. Halsted, Ann Reisenauer, Carolyn Back and Gerald S. Gotterer* 485

Decreased Absorption of Calcium, Magnesium, Zinc and Phosphorus by Humans Due to Increased Fiber and Phosphorus Consumption as Wheat Bread. *John G. Reinhold, Bahram Faradji, Parichehr Abadi and Faramarz Ismail-Beigi* 493

Intestinal Disaccharidases in the Rat: Effects of Pregnancy and Diabetes. *M. K. Younoszai and J. Ranshaw* 504

Influence of Pyridoxine Supplementation on Vitamin B-6 Levels in Milk of Rats Deficient in the Vitamin. *M. Rita Thomas and Avanelle Kirksey* 509

Cholesterol Turnover and Tissue Distribution in the Guinea Pig in Response to Dietary Cholesterol. *Michael H. Green, Marilyn Crim, Maret Traber and Rosemarie Ostwald* 515

The Influence of Dietary Inositol on Glyceride Composition and Synthesis in Livers of Rats Fed Different Fats. *D. B. Andersen and B. J. Holub* 529

Activity of L-Cysteinesulfinate Carboxy-Lyase and Persulfurase in Livers of Rats Fed Different Levels of Sulfate and Cysteine. *Betty Ann Whittle and Carol Hwang Lee* 537

Effects of Different Levels of Dietary Iron on Pregnancy Superimposed Upon Growth in the Rat. *Wen-Ju Lin and Avanelle Kirksey* 543

Nature of the Dietary Carbohydrate and Metabolism of Glycosaminoglycans and Glycoproteins in Rats. *P. V. G. Menon and P. A. Kurup* 555

Vitamin A Metabolism During the Repletion of Zinc Deficient Rats. *Ellen D. Brown, Winnie Chan and J. Cecil Smith, Jr.* 563

Alterations in Vitamin A Metabolism During Zinc Deficiency and Food and Growth Restriction. *J. Cecil Smith, Jr., Ellen D. Brown, E. G. McDaniel and Winnie Chan* 569

Effect of Dietary Fat on Fluoride Absorption and Tissue Fluoride Retention in Rats. *E. L. McGown, D. L. Kolstad and J. W. Suttie* 575

No. 5 MAY 1976

Kanehiro Takaki—A Biographical Sketch. *Yoshinori Itokawa* 581

The Influence of Dietary Peroxides, Selenium and Vitamin E on Glutathione Peroxidase of the Gastrointestinal Tract. *Nalini N. Vilas, R. Raines Bell and H. H. Draper* ... 589

Free Amino Acid Patterns and the Distribution of ^{14}C from [U-^{14}C]-L-Leucine, [U-^{14}C]-L-Lysine, and [U-^{14}C]-L-Alanine in the Tissues of Young Adult Rats. *Diane F. Birt and Helen E. Clark* 597

Effects of a Single Intoxicating Dose of Ethanol on the Vitamin Profile of Organelles in Rat Liver and Brain. *Oscar Frank, Anita Luisada-Opper, Michael F. Sorrell, Rowen Zetterman and Herman Baker* 606

Changes in Diet and Patterns of Feeding Activity of Developing Rats. *Robert S. Redman and Laura R. Sweney* 615

Yolk Lipids of Developing Atherosclerosis-Susceptible White Carneau and Atherosclerosis-Resistant Show Racer Pigeon Embryos. *Eva B. Cramer and Samuel C. Smith* 627

Alteration of Glucose Tolerance by Dietary L-Tryptophan in Rats. *James S. Wittman, III* 631

Nitrogen Metabolism and Reproductive Response of Gravid Swine Fed an Arginine-Free Diet During the Last 84 Days of Gestation. *Robert A. Easter and David H. Baker* 636

Metabolism of D- and L-Tryptophan in Dogs. *Keith C. Triebwasser, Patricia B. Swan, LaVell M. Henderson and John A. Budny* 642

Stability of Some Pyridoxal Phosphate-Dependent Enzymes in Vitamin B-6 Deficient Rats. *J. Edward Hunter and Alfred E. Harper* 653

Protein Requirements of Man: Obligatory Urinary and Fecal Nitrogen Losses in Elderly Women. *Nevin S. Scrimshaw, W. Davy A. Perera and Vernon R. Young* .. 665

Dietary Calcium, Calcium Kinetics and Plasma Parathyroid Hormone Concentration in Cows. *C. F. Ramberg, Jr., G. P. Mayer, D. S. Kronfeld and J. T. Potts, Jr.* 671

Influence of Different Levels of Dietary Pyridoxine on Certain Parameters of Developing and Mature Brains in Rats. *Jane E. Aycock and Avanelle Kirksey* 680

Influence of Dietary Zinc on Lead Toxicity in the Rat. *Florian L. Cerklewski and Richard M. Forbes* 689

Effect of Litter Size on Weight Gain in Rats. *Judith J. Wurtman and Sanford A. Miller* 697

Effect of Selenium on Rat Growth, Growth Hormone and Diet Utilization. *Richard C. Ewan* 702

Gluconeogenesis from Lactate in Liver of Stress-Susceptible and Stress-Resistant Pigs. *Nancy M. DiMarco, Donald C. Beitz, Jerry W. Young, David G. Topel and Lauren L. Christian* 710

No. 6 JUNE 1976

Further Studies on the Arginine Requirement of the Rabbit. *Ishola Adamson and Hans Fisher* 717

Biological Activity of 24,25-Dihydroxycholecalciferol in Chicks and Rats. *Helen L. Henry, Anthony W. Norman, Alan N. Taylor, David L. Hartenbower and Jack W. Coburn* 724

Significance of Choline Synthesis in the Oxidation of the Methionine Methyl Group in Rats. *G. L. Case, A. D. Mitchell, A. E. Harper and N. J. Benevenga* 735

The Effect of a Nonabsorbable Lipid, Sucrose Polyester, on the Absorption of Dietary Cholesterol by the Rat. *Fred H. Mattson, R. J. Jandacek and M. R. Webb* 747

Isolation of Monoferric Phytate from Wheat Bran and Its Biological Value as an Iron Source to the Rat. *Eugene R. Morris and Rex Ellis* 753

Determination of Antitrypsin Activity on Agar Plates: Relationship between Antitrypsin and Biological Value of Soybean for Trout. *M. Sandholm, R. R. Smith, J. C. H. Shih and M. L. Scott* 761

Prenatal Aspects of Ascorbic Acid Metabolism in the Albino Rat. *Pedro Rosso and Edward Norkus* 767

Effect of Fluoride on the Mobilization of Skeletal Magnesium and Soft-Tissue Calcinosis During Acute Magnesium Deficiency in the Rat. *R. H. Ophaug and L. Singer* 771

Influence of Dietary Selenium on Lead Toxicity in the Rat. *Florian L. Cerklewski and Richard M. Forbes* 778

Effect of Vitamin A and Undernutrition on the Susceptibility of Rodents to a Malarial Parasite *Plasmodium berghei. Savithri Krishnan, A. D. Krishnan, A. S. Mustafa, G. P. Talwar and V. Ramalingaswami* 784

Protein Quality of Some Representative Latin American Diets by Rat Bioassay. *Jose Felix Chavez and Peter L. Pellett* 792

Effects of Fluoride and Ethane-1-Hydroxy-1,1-Diphosphonate on Bone Metabolism in the Growing Chick. *M. M. Chan, R. B. Rucker and R. S. Riggins* 802

Duodenal Nutrient Infusion: Effects on Feeding in Intact and Vagotomized Rabbits. *Milan Rezek and Donald Novin* 812

A Conspectus of Research on Vitamin C. Requirements of Man. *M. Isabel Irwin and Bobbie K. Hutchins* 821

Errata 880

No. 7 JULY 1976

Richard Henry Barnes—A Dedication. *Fredric W. Hill* 881

Time Sequence of Lipogenic Changes in Adipose Tissue of Rats When Converted from Ad Libitum Feeding to Meal-Eating. *Michael K. Armstrong, Dale R. Romsos and Gilbert A. Leveille* 884

Vitamin E and Selenium Interrelations in the Diet of Atlantic Salmon (Salmo salar): Gross, Histological, and Biochemical Deficiency Signs. *Hugh A. Poston, Gerald F. Combs, Jr. and Louis Leibovitz* 892

Protein Synthesis in Zinc Deficient Rats During Tularemia. *Robert S. Pekarek and Michael C. Powanda* 905

Bioavailability of Zinc in Milk and Soy Protein-Based Infant Formulas. *Berislav Momčilović, Bartholomeus Belonje, Alexandre Giroux and Bhagwan G. Shah* 913

Effect of Dietary α Tocopherol on Liver Microsomes and Mitochondria of Aging Rats. *Lynn S. Grinna* 918

The Effect of Cycloheximide on Hepatic RNA Synthesis and Nucleolar Size in Rats Force-Fed a Threonine-Devoid Diet. *Herschel Sidransky, Sheldon M. Epstein, Ethel Verney and Robert S. Verbin* 930

Decreased Dietary Protein or Energy Intake and Plasma Growth Hormone Levels of the Pregnant Pig, Its Fetuses and Developing Progeny. *Tola Atinmo, Carlos Baldijão, Wilson G. Pond and Richard H. Barnes* 940

Immunoreactive Growth Hormone Levels in Pigs Fed Protein or Energy Restricted Diets During the Postweaning Period. *Tola Atinmo, Carlos Baldijão, Wilson G. Pond and Richard H. Barnes* 947

Plasma Adrenocorticosteroid Levels in Protein and Energy Restricted Pigs. *Carlos Baldijão, Tola Atinmo, Wilson G. Pond and Richard H. Barnes* 952

Influence of Ascorbic Acid on Selenium Nutrition in the Chick. *G. F. Combs, Jr. and G. M. Pesti* 958

Differential Effects of High Dietary Levels of Vitamin A on the Vitamin E–Selenium Nutrition of Young and Adult Chickens. *G. F. Combs, Jr.* 967

The Effect of a Long-Term Excess of Pyridoxine on the Fatty Acid Composition of the Major Phospholipids in the Rat. *C. Bernard DeLorme and Paul-J. Lupien* 976

A Conspectus of Research on Iron Requirements of Man. *Jean Bowering, Ann Macpherson Sanchez and M. Isabel Irwin* 985

Invitations for Nominations 1075

Program and Abstracts of Papers for the Second Joint Meeting of The American Institute of Nutrition, The American Society for Clinical Nutrition, and The Nutrition Society of Canada ..... i–xxxvii

No. 8 AUGUST 1976

Assessment of Effect of Starvation, Glucose, Fatty Acids, and Hormones on α-Decarboxylation of Leucine in Skeletal Muscle of Rat. *Harbhajan S. Paul and Siamak A. Adibi* 1079

Adaptive Response of Lysine and Threonine Degrading Enzymes in Adult Rats. *Shu-Heh W. Chu and D. M. Hegsted* 1089

Plasma Amino Acids in Reptiles After Feeding Protein or Amino Acids and After Injecting Amino Acids. *Jack D. Herbert and Roland A. Coulson* 1097

Rat Strain Differences in Cyclic-AMP Levels in Liver and Epididymal Fat Pad Tissue as Influenced by Glucagon. *Lilly B. Gardner, Elizabeth B. Spannhake and Sheldon Reiser* 1102

Utilization of L-Methionine Sulfoxide, L-Methionine Sulfone and Cysteic Acid by the Weanling Rat. *G. Harvey Anderson, David V. M. Ashley and John D. Jones* 1108

Evidence for Lack of an Effect of Dietary Fluoride Level on Reproduction in Mice. *S. Tao and J. W. Suttie* 1115

Effect of Type of Dietary Fat, Cholesterol, and Chenodeoxycholic Acid on Gallstone Formation, Bile Acid Kinetics, and Plasma Lipids in Squirrel Monkeys. *Naomi Tanaka, Oscar W. Portman and Toshiaki Osuga* 1123

Blood Metabolites and Glucose Metabolism in the Fed and Fasted Chicken. *Panfilo S. Belo, Dale R. Romsos and Gilbert A. Leveille* 1135

Thiamin Deficiency and the Pentose Phosphate Cycle in Rats: Intracerebral Mechanisms. *David W. McCandless, Alison D. Curley and Carol E. Cassidy* 1144

Zinc Deficiency in the Weanling Rat: Effects on Liver Composition and Polysomal Profiles. *Gary J. Fosmire, Mary Ann Fosmire and Harold H. Sandstead* 1152

Dietary Lipid Requirements of Adult Lobsters, *Homarus americanus* (M.E.). *John D. Castell and Jane F. Covey* 1159

Trace Mineral Deficiencies in Rats Caused By Feeding Rapeseed Flours During Growth, Gestation and Lactation. *G. Harvey Anderson, L. Harris, A. V. Rao and J. D. Jones* 1166

Cholesterol Synthesis in Germfree and Conventional Rats. *Mitsuo Ukai, Akio Tomura and Madoka Ito* 1175

Effect of Dilauryl Succinate on Reproduction of the Cock and Hen and Preventive Effect of Vitamin E. *Minoru Yoshida and Hiroshi Hoshii* 1184

Effects of Dietary Protein and Lysine Levels on Plasma Amino Acids, Nitrogen Retention and Egg Production in Laying Hens. *Myung S. Chi and George M. Speers* ... 1192

Utilization of Energy for Maintenance and for Fat and Lean Gains by Mice Selected for Rapid Postweaning Growth Rate. *Nancy L. Canolty and L. J. Koong* 1202

Invitations for Nominations 1209

Proceedings of the Fortieth Annual Meeting of the American Institute of Nutrition. Grand Hotel, Anaheim, California, April 11–16, 1976 1213

No. 9 SEPTEMBER 1976

George Raymond Cowgill—A Biographical Sketch. *James M. Orten* 1227

Effects of Early Severe Malnutrition on Heart and Skeletal Muscle Lactate Dehydrogenase. *David Penney, Debra Anderson and John Dongas* 1235

Dietary Influence on Bile Acid Conjugation in the Cat. *B. Rabin, R. J. Nicolosi and K. C. Hayes* 1241

Decreased Plasma Insulin But Normal Glucagon in Rats Fed Low Protein Diets. *Udaya M. Kabadi, Albert B. Eisenstein and Inge Strack* 1247

Teratogenic Effects of Magnesium Deficiency in Rats. *Lucille S. Hurley, Gladys Cosens and Linda L. Theriault* 1254

Magnesium, Calcium and Zinc Levels of Maternal and Fetal Tissues in Magnesium Deficient Rats. *Lucille S. Hurley, Gladys Cosens and Linda L. Theriault* 1261

Enhancement of Ca^{++} Uptake by Lactose in the Rat Small Intestine. *H. J. Armbrecht and R. H. Wasserman* 1265

Factors Affecting the Rate of Gluconeogenesis from L-Cysteine in the Perfused Rat Liver. *Ronald C. Simpson and Richard A. Freedland* 1272

Effect of Dietary Fat on Hepatic Metabolism of ^{14}C-Oleic Acid and Very Low Density Lipoprotein Triglyceride in the Gerbil. *R. J. Nicolosi, M. G. Herrera, M. el Lozy and K. C. Hayes* 1279

Nitrogen Retention in Men Fed Isolated Soybean Protein Supplemented with L-Methionine, D-Methionine, *N*-Acetyl L-Methionine, or Inorganic Sulfate. *Allison Yates Zezulka and Doris Howes Calloway* 1286

Comparison of the Binding of Various Bile Acids and Bile Salts In Vitro by Several Types of Fiber. *Jon A. Story and David Kritchevsky* 1292

Changes in Patterns of Feeding Activity, Parotid Secretory Enzymes and Plasma Corticosterone in Developing Rats. *Robert S. Redman and Leo M. Sreebny* 1295

Plasma Amino Acids of Infants Consuming Soybean Proteins With and Without Added Methionine. *George G. Graham, William C. MacLean, Jr. and Robert P. Placko* .. 1307

Effects in the Rat of Environmental Temperature, Diet Dilution and Treadmill Running on Voluntary Food Intake, Body Composition and Endocrine Organ Mass: A Multiple Regression Analysis. *Elmer W. Hartsook and John C. M. Nee* 1314

Effects in the Rat of Environmental Temperature, Diet Dilution, and Treadmill Running on Liver and Adipose Enzymes and Metabolism of ^{14}C-Glucose: A Multiple Regression Analysis. *Elmer W. Hartsook and Roy J. Martin* 1326

Regulation of Intestinal Calcium Absorption in the Laying Quail: Independent of Kidney Vitamin D Hydroxylation. *Arie Bar, Uri Eisner, Giulia Montecuccoli and Shmuel Hurwitz* 1336

Controlling Factors in the Development of Ceruloplasmin in Pigs during the Neonatal Growth Period. *Irene C. Chang, Dan C. Milholland and Gennard Matrone* 1343

Adipose Tissue Cell Size and Lipolysis in the Rat: Response to Exercise Intensity and Food Restriction. *E. Wayne Askew and Arthur L. Hecker* 1351

Amino Acid Requirements of the Growing Mouse. *Ann-Marie John and J. Milton Bell* 1361

Optimum Dietary Protein to Energy Ratio for Channel Catfish Fingerlings, *Ictalurus punctatus*. *Donald L. Garling, Jr. and Robert P. Wilson* 1369

Letters to the Editor 1376

Invitations for Nominations 1379

No. 10 OCTOBER 1976

Effects of Treatment of Whole Fat Soybeans or Soy Flour with Formaldehyde to Protect the Polyunsaturated Fatty Acids from Biohydrogenation in the Rumen. *Barbara A. Ackerson, Ronald R. Johnson and R. L. Hendrickson* 1383

Effect of Dietary Chromium on Glucose Tolerance and Serum Cholesterol in Guinea Pigs. *Alan M. Preston, Richard P. Dowdy, Mary Ann Preston and James N. Freeman* 1391

Intracellular Distribution of Phosphate in the Underfed Rat Developing Weakness and Coma Following Total Parenteral Nutrition. *Robert Derr and Leslie Zieve* 1398

Postnatal Patterns of Brain Lipids in Progeny of Vitamin B-6 Deficient Rats Before and After Pyridoxine Supplementation. *M. Rita Thomas and Avanelle Kirksey* 1404

Postnatal Patterns of Fatty Acids in Brain of Progeny from Vitamin B-6 Deficient Rats Before and After Pyridoxine Supplementation. *M. Rita Thomas and Avanelle Kirksey* 1415

Effect of Dietary Copper, Manganese, and Zinc on Nitrogen Equilibrium and Mineral Distribution Subsequent to Trauma in Mature Rats. *Henry J. Thompson, Paul Griminger and Joseph L. Evans* 1421

A Method to Measure the Adsorption of Bile Salts to Vegetable Fiber of Differing Water Holding Capacity. *M. A. Eastwood, Rhoda Anderson, W. D. Mitchell, J. Robertson and S. Pocock* 1429

Comparative Human Intestinal Bioavailability of Vitamin B-6 from a Synthetic and a Natural Source. *Edward W. Nelson, Jr., Helen Lane and James J. Cerda* 1433

Effect of Water of Hydration on the Measurement of the Protein Efficiency Ratio of Casein and Soybean Protein with Rats. *Daniel T. Hopkins and Frederick H. Steinke* 1438

Influence of Molasses Lignin-Hemicellulose Fractions in Rat Nutrition. *George C. Fahey, James E. Williams and George A. McLaren* 1447

Effects of Dietary Carbohydrate, Fat and Protein on Growth, Body Composition and Blood Metabolite Levels in the Dog. *Dale R. Romsos, Panfilo S. Belo, Maurice R. Bennink, Werner G. Bergen and Gilbert A. Leveille* 1452

Influence of Diet on Glucose Tolerance, on the Rate of Glucose Utilization and on Gluconeogenic Enzyme Activities in the Dog. *Panfilo S. Belo, Dale R. Romsos and Gilbert A. Leveille* 1465

Effect of Stable Strontium on the Tissue Alkaline and Acid Phosphatase Activities of Rat: Feeding Studies. *Sharad G. Kshirsagar* 1475

Response of Immunized, Parenterally Nourished Rats to Challenge Infection with the Nematode, *Trichinella spiralis*. *Gilbert A. Castro, Florentino Badial-Aceves, Phillip R. Adams, Edward M. Copeland and Stanley J. Dudrick* 1484

Effect of Dietary Protein Depletion on the Galactose Elimination Capacity in Intact Rats. *Hendrik Vilstrup and S. Keiding* 1492

α-Aminoisobutyric Acid Transport in Liver Slices from Rats Fed Low Protein Meals. *Jean K. Tews and Alfred E. Harper* 1497

The Redox State and the Concentration of Ketone Bodies in Tissues of Rats Fed Carbohydrate Free Diets. *Abraham M. Konijn, Naama Carmel and Nathan A. Kaufmann* 1507

Evidence That Vitamin A Is Not Required for the Biosynthesis of Ovalbumin in Chicks. *William D. Sneider and George Wolf* 1515

Effects of Alkali Treated Proteins: Feeding Studies with Free and Protein-Bound Lysinoalanine in Rats and Other Animals. *A. P. de Groot, P. Slump, V. J. Feron and L. van Beek* 1527

No. 11 NOVEMBER 1976

Dietary Fat Level as Affecting Running Performance and Other Performance-Related Parameters of Rats Restricted or Non-Restricted in Food Intake. *Dirk Tollenaar*.. 1539

Influence of Level and Type of Dietary Protein, and of Level of Feeding on Feed Utilization by Rainbow Trout. *C. Y. Cho, S. J. Slinger and H. S. Bayley* 1547

The Mechanism of Hypoglycemia Due to Semistarvation in the Rat. *Gábor Gács* 1557

Influence of Fat Level and Type of Carbohydrate on the Capacity of Pectin in Lowering Serum and Liver Lipids of Young Rats. *Mei Ling W. Chang and Margaret A. Johnson* 1562

Induction of Microsomal Drug Metabolizing Enzymes by Oral Contraceptives in Protein-Malnourished Rats. *Dileep S. Sachan* 1569

Effects of Stock or Purified Diet on Rat Liver Enzymes Involved in the Synthesis of Dimethyl Selenide. *H. Steve Hsieh and Howard E. Ganther* 1577

Nitrogen Intake and Tumorigenesis in Rats Injected with 1,2-Dimethylhydrazine. *Douglas C. Topping and Willard J. Visek* 1583

Metallothionein and Its Relationship to the Metabolism of Dietary Zinc in Rats. *Mark P. Richards and Robert J. Cousins* 1591

Digestion and Absorption of Bovine Milk Xanthine Oxidase and Its Role as an Aldehyde Oxidase. *Charles Y. Ho and Andrew J. Clifford* 1600

myo-Inositol Metabolism in the Neonatal and Developing Rat Fed a *myo*-Inositol Free Diet. *Louis E. Burton, Rita E. Ray, James R. Bradford, Joanne P. Orr, Jeffrey A. Nickerson and William W. Wells* 1610

myo-Inositol Metabolism During Lactation and Development in the Rat. The Prevention of Lactation-Induced Fatty Liver by Dietary *myo*-Inositol. *Louis E. Burton and William W. Wells* 1617

Absorption of Dietary β-Sitosterol in Laying Hens and Its Incorporation Into the Egg. *Bhalchandra J. Kudchodkar, Louis Horlick and James B. O'Neil* 1629

Characteristic Inhibition of In Vitro Swelling of Purified Rat Liver Mitochondria Induced by Ca^{2+} or Thyroxine by Feeding Rats a Low Casein Diet. *Naoko Harada* .. 1637

The Biotin Requirement of Rats Fed 20% Egg White. *Leslie M. Klevay* 1643

Maternal Protein Malnutrition During Gestation Alone and Its Effects on Plasma Insulin Levels of the Pregnant Pig. Its Fetuses and the Developing Offspring. *Tola Atinmo, Carlos Baldijão, Wilson G. Pond and Richard H. Barnes* 1647

Plasma Insulin Levels in Weaned Pigs Fed Protein or Energy Restricted Diets. *Tola Atinmo, Carlos Baldijão, Wilson G. Pond and Richard H. Barnes* 1654

A Plasma Glycoprotein Depressed in Vitamin A. Deficiency in the Rat: α_1-Macroglobulin. *Timothy C. Kiorpes, Salvatore J. Molica and George Wolf* 1659

Effect of Glycerol on Lipogenic Enzyme Activities and on Fatty Acid Synthesis in the Rat and Chicken. *Ming Huey Lin, Dale R. Romsos and Gilbert A. Leveille* 1668

Leukocyte Transketolase Activity as an Indicator of Thiamin Nutriture in Rats. *Chuan Huan Cheng, Mary Koch and Robert E. Shank* 1678

No. 12 DECEMBER 1976

Disparate Hydration of Adipose and Lean Tissue Require a New Model for Body Water Distribution in Man. *Jack Wang and Richard N. Pierson, Jr.* 1687

The Assessment of Human Body Composition During Weight Reduction: Evaluation of a New Model for Clinical Studies. *R. N. Pierson, Jr., J. Wang, M. U. Yang, S. A. Hashim and T. B. Van Itallie* 1694

Importance of Sarcosine Formation in Methionine Methyl Carbon Oxidation in the Rat. *A. D. Mitchell and N. J. Benevenga* 1702

Growth Depression and Tissue Reaction to the Consumption of Excess Dietary Methionine and S-methyl-L-cysteine. *N. J. Benevenga, M.-H. Yeh and J. J. Lalich* 1714

Evidence for S-Adenosylmethionine Independent Catabolism of Methionine in the Rat. *G. L. Case and N. J. Benevenga* 1721

Effect of Antibiotics on Growth of the Immature Rat. *Rajender K. Chawla, Theodore Hersh, Dwight W. Lambe, Jr., Allan D. Wadsworth and Daniel Rudman* 1737

Vitamin K Requirement and the Concentration of Vitamin K in Rat Liver. *Thomas E. Knauer, Charles M. Siegfried and John T. Matschiner* 1747

Intestinal Absorption of Phosphate: Action of Protein Synthesis Inhibitors and Glucocorticoids in the Rat. *C. Ferraro, M. Ladizesky, M. Cabrejas, R. Montoreano and C. Mautalen* 1752

Serum Lipid and Lipoprotein Responses of Six Nonhuman Primate Species to Dietary Changes in Cholesterol Levels. *Sathanur R. Srinivasan, Bhandaru Radhakrishnamurthy, Charles C. Smith, Robert H. Wolf and Gerald S. Berenson* 1757

Effect of Modified and Unmodified Tapioca Starches on ^{59}Fe Retention in Rats. *Lamartine F. Hood, Darrell R. VanCampen, William A. House and Ellen Szatkowski* 1768

Effects of Zinc and Vitamin A Deficient Diets on the Hepatic Mobilization and Urinary Excretion of Vitamin A in Rats. *Susan M. Carney, Barbara A. Underwood and John D. Loerch* 1773

Effect of Dietary Lactose at Levels Comparable to Human Consumption on Cholesterol and Bile Acid Metabolism of Conventional and Germ-free Rats. *B. Wostmann, E. Bruckner-Kardoss, M. Beaver, L. Chang and D. Madsen* 1782

Further Studies on the Role of the Adrenal Hormones in the Responses of Rats to Meal-Feeding. *Carolyn D. Berdanier, Richard Wurdeman and Richard B. Tobin* 1791

Superoxide Dismutase Activity in Polymorphonuclear Leukocytes and Alveolar Macrophages of Protein Malnourished Rats and Guinea Pigs. *Ronald R. Watson, Manfred Rister and Robert L. Baehner* 1801

Effect of Essential and Nonessential Fatty Acids in Complex Mixture on Fatty Acid Composition of Liver Lipids. *W. O. Caster, James W. Andrews, Jr., Hans Mohrhauer and Ralph T. Holman* 1809

Effect of Chronic Hypovitaminosis A on Water Metabolism in the Weanling Rat. *Lado Mahant and H. D. Eaton* 1817

Kinetic Modifications of the Acetylcholinesterase and $(Ca^{2+} + Mg^{2+})$-ATPase in Rat Erythrocytes by Cholesterol Feeding. *Bernabe Bloj, Mercedes G. Galo, Roberto D. Morero and Ricardo N. Farias* 1827

Letters to the Editor. 1835

Author Index to Volume 106 1838

Subject Index to Volume 106 1847

VOLUME 106 OF

THE JOURNAL OF NUTRITION

IS DEDICATED TO

RICHARD HENRY BARNES

— — supplementation of rice diets, relation to growth and fatty livers in rats, 111.
— — transport, hepatic, protein depletion, effects in rat liver slices, 1497.
α-Aminoisobutyric acid, transport in liver slices from rats fed low protein meals, 1497.
Antibiotics, growth of the immature rat, 1737.
Antitrypsin activity, biological value of soybean for trout, 761.
Arginine free diet fed to gravid swine during last 84 days of gestation, effects on nitrogen metabolism, 636.
— requirement of the rabbit, 717.
Ascorbic acid (see Vitamin C)
Atherosclerosis, yolk lipids of developing atherosclerosis-susceptible white carneau and atherosclerosis-resistant show racer pigeon embryos, 627.

B

Baboon, circadian and menstrual cycle variation in serum ascorbic acid levels, 329.
Bacon Field Chow, a biographical sketch, 17.
Balance studies, 307.
Beans, raffinose, stachyose and oligosaccharide-free, hydrogen production in rats, 466.
Bile acid(s) adsorption on to vegetable fiber of differing water holding capacity, a method, 1429.
— — and salts, binding by several types of fiber in vitro, 1292.
— — conjugation, dietary influence in the cat, 1241.

— — kinetics, dietary fat, cholesterol and chenodeoxycholic acid effects in squirrel monkeys, 1123.
— — metabolism, dietary lactose effects in conventional and germfree rats, 1782.
Biographical sketch, Bacon Field Chow, 17.
— —, George Raymond Cowgill, 1229.
— —, Kanehiro Takaki, 583.
Biohydrogenation, treatment of whole fat soybeans or soy flour with formaldehyde to protect the polyunsaturated fatty acids in the rumen, 1383.
Biotin requirement, rats fed 20% egg white, 1643.
Blood metabolites and glucose metabolism in the fed and fasted chicken, 1135.
— —, dietary fat, carbohydrate and protein effects in the dog, 1452.
Body composition, dietary fat, carbohydrate and protein effects in the dog, 1452.
— — during weight reduction in humans, evaluation of a new model for clinical studies, 1694.
— —, environmental temperature, diet dilution and treadmill running, effects in rats, 1314.
— —, litter size, effect on weight gain in rats, 697.
Bone metabolism, fluoride and ethane-1-hydroxy-1,1-diphosphonate, effects in the growing chick, 802.
Brain, cholinesterase activity effects of early protein-energy malnutrition and environmental changes in the rat, 342.
—, developing and mature, influence of different levels of dietary pyridoxine in rats, 680.
— development, effects of feeding lysine and threonine fortified bread during gestation and lactation in rats, 41.
—, fatty acids, postnatal patterns in progeny of vitamin B6 deficient rats before and after pyridoxine supplementation, 1415.
— lipids, linolenic acid, possible dietary essential role, development of young rat, 86.
— —, postnatal patterns in progeny of vitamin B6 deficient rats before and after pyridoxine supplemenation, 1404.
— metabolism, thiamin deficiency and the pentose phosphate cycle in rats, 1144.
—, vitamin profile of organelles in rats, effects of a single intoxicating dose of ethanol, 606.
Bread fortified with lysine and threonine, effects of feeding during gestation and lactation on growth of brain in rats, 41.
—, fortified with lysine and threonine, effects of feeding during gestation and lactation on growth of offspring in rats, 33.

C

Calcinosis, 1α,25-dihydroxycholecalciferol-like activity in Cestrum diurnum in the chick, 457.
—, soft tissue during acute magnesium deficiency, effects of fluoride, 771.
Calcium absorption, enhanced by lactose in the rat small intestine, 1265.
— —, fiber and phosphorus consumption as wheat bread, 493.
— —, regulation in the laying quail, independent of kidney vitamin D hydroxylation, 1336.
—, dietary, calcium kinetics and plasma parathyroid hormone concentration in cows, 671.
—, inhibition of in vitro swelling of purified liver mitochondria of rats fed a low casein diet, 1637.
— levels in maternal and fetal tissues in magnesium deficient rats, 1261.
— metabolism, 24,25-dihydroxycholecalciferol activity in chicks and rats, 724.
Cancer induced in 1,2-dimethylhydrazine treated rats fed graded concentrations of dietary protein with and without added urea, 1583.
Carbohydrate, dietary, growth, body composition and blood metabolites in the dog, 1452.
—, dietary, glycosaminoglycans and glycoprotein metabolism in rats, 555.
—, dietary type, influence on the capacity of pectin in lowering serum and liver lipids of young rats, 1562.
— free diets, redox state and concentration of ketone bodies in tissues of rats, 1507.
— metabolism, glucose tolerance, alteration by L-tryptophan in rats, 631.
Carnitine supplementation of rice diets, relation to growth and fatty livers in rats, 111.
Cat, bile acid conjugation as influenced by diet, 1241.
Cattle, calcium kinetics and plasma parathyroid hormone concentration in cows, 671.
Cerebral metabolism, thiamin deficiency and the pentose phosphate cycle in rats, 1144.
Ceruloplasmin, development in neonatal pigs, 1343.
Chenodeoxycholic acid, dietary, gallstone formation, bile acid kinetics and plasma lipids, effects in squirrel monkeys, 1123.
Chick(s) (see Chicken(s))
Chicken, absorption of dietary β-sitosterol in laying hens and its incorporation into eggs, 1629.
—, adipose tissue development in the pullet as influenced by diet, 443.
—, ascorbic acid influence on selenium nutrition in the chick, 958.
—, blood metabolites and glucose metabolism in chicken, 1135.
—, choline utilization as influenced by levels of dietary protein and methionine, 412.
—, dietary protein and lysine effects on plasma amino acids, nitrogen retention and egg production in laying hens, 1192.
—, 1α,25-dihydroxycholecalciferol-like activity in a calcinogenic plant, Cestrum diurnum, in the chick, 457.
—, 24,25-dihydroxycholecalciferol activity in chicks and rats, 724.
—, dilauryl succinate effects on reproduction, preventive effect of vitamin E, 1184.
—, evidence that vitamin A is not required for the biosynthesis of ovalbumin in chicks, 1515.
—, fluoride and ethane-1-hydroxy-1,1-diphosphonate, bone metabolism in the growing chick, 802.
—, glutathione (reduced) changes in chick tissues during onset and regression of nutritional muscular dystrophy, 181.
—, growth depressing factors in faba beans, 275.
—, iron supplements, biological availability for chicks, 265.
—, lipogenesis in iron deficiency anemic chicks and rats, effects of dietary fats, 405.

—, lipogenic enzyme activities and fatty acid synthesis, effects of dietary glycerol in rats and chicken, 1668.
—, silicon requirement for articular cartilage and connective tissue formation in the chick, 478.
—, vanadium (dietary) effect on fatty acid and cholesterol synthesis and turnover in the chick, 249.
—, vitamin E-selenium nutrition, effects of high dietary levels of vitamin A, 967.
Cholecalciferol (see Vitamin D)
Cholesterol absorption, effects of feeding dietary β-sitosterol to laying hens and its incorporation into eggs, 1629.
— —, sucrose polyester, a nonabsorbable lipid in rats, 747.
—, dietary, hepatic protein synthesis, reduced glutathione levels and serine dehydratase activity in the rat, 94.
—, dietary, gallstone formation, bile acid kinetics and plasma lipids, effects in squirrel monkeys, 1123.
—, dietary, kinetic modifications of the acetylcholinesterase and $(Ca^{2+} + Mg^{2+})$-ATPase in rat erythrocyte, 1827.
—, dietary levels, serum lipids and lipoprotein responses of six nonhuman primate species, 1757.
— metabolism, dietary lactose effects in conventional and germfree rats, 1782.
— —, effect of dietary vanadium in the chick, 249.
—, serum and tissue levels in rats, influence of dietary fibers, 118.
—, serum, dietary chromium effects in guinea pigs, 1391.
— synthesis in germfree and conventional rats, 1175.
—, turnover and tissue distribution in the guinea pig in response to dietary cholesterol, 515.
Cholestyramin feeding, cholesterol synthesis in germfree and conventional rats, 1175.
Choline synthesis, oxidation of the methionine methyl group in rats, 735.
— utilization influenced by levels of dietary protein and methionine in the chick, 412.
Cholinesterase activity, brain and adrenal gland, effect of early protein-energy malnutrition and environmental changes in the rat, 342.
Chromium, trace metal interactions in mouse and rat tissue, 198.
—, dietary, glucose tolerance and serum cholesterol in guinea pig, 1391.
Citrate cleavage enzyme, repression by gluten in rat liver and adipose tissue, 335.
Cobalt supplementation, vitamin B12 deficiency and metabolic changes in (golden) hamsters, 77.
Connective tissue formation, silicon requirement in the chick, 478.
Conspectus, iron requirements of man, 985.
—, vitamin C requirements of man, 821.
Copper, ceruloplasmin development in pigs during the neonatal growth period, 1343.
—, dietary, nitrogen equilibrium and mineral distribution subsequent to trauma in mature rats, 1421.
—, trace metal interactions in mouse and rat tissues, 198.
Corticosteroid levels in protein and energy restricted pigs, 952.
Corticosterone, adrenal function in young of protein deprived pregnant rats, 392.
—, changes in patterns in developing rats, 1295.
Cortisol, pyruvate carboxylase and phosphoenolpyruvate carboxykinase activity in the rat liver, 103.
—, role of adrenal hormones in the lipogenic response of rats to meal-feeding, 1791.
Cow (see Cattle)
Creatine metabolism, creatine pool size and turnover in relation to creatine intake in men, 371.
Cyclic AMP, rat strain differences as influenced by glucagon, 1102.
Cycloheximide, effects on hepatic RNA synthesis and nucleolar size in rats force fed a threonine-devoid diet, 930.
Cysteine, dietary, L-cysteinesulfinate carboxy-lyase and persulfurase activity in livers of rats, 537.
L-Cysteine, rate of gluconeogenesis in perfused rat liver, 1272.
Cysteine, utilization of oxidized forms of sulfur amino acids by the weanling rat, 1108.
L-Cysteinesulfinate carboxy-lyase activity, in livers of rats fed different levels of sulfate and cysteine, 537.

D

Development, adrenal function in young of protein deprived pregnant rats, 392.
—, brain, influence of different levels of dietary pyridoxine in rats, 680.
—, changes in diet and patterns of feeding activity in rats, 615.
—, changes in patterns of feeding activity, parotid secretory enzymes and plasma corticosterone in rats, 1295.
—, *myo*-inositol metabolism in neonatal rats, 1610.
—, growth hormone levels in pigs fed protein or energy restricted diets during the postweaning period, 947.
—, growth homone levels of the pregnant pig, its fetuses and progeny, effects of decreased dietary protein and energy intake, 940.
—, lenticular opacities in young rats as a consequence of maternal diets low in tryptophan and/or vitamin E, 222.
—, litter size, effect on weight gain in rats, 697.
—, neonatal, ceruloplasmin development in pigs, controlling factors, 1343.
—, postnatal patterns in brain lipids in progeny of vitamin B6 deficient rats before and after pyridoxine supplementation, 1404.
—, postnatal patterns in fatty acids in brains of progeny of vitamin B6 deficient rats before and after pyridoxine supplementation, 1415.
—, silicon requirement for articular cartilage and connective tissue formation in the chick, 478.
Diabetes, intestinal disaccharidase in the pregnant rat, 504.
Digestion, milk xanthine oxidase, its role as an aldehyde oxidase, 1600.
Dilauryl succinate, reproduction of the cock and hen, preventive effect of vitamin E, 1184.
1,2-Dimethylhydrazine injected rats fed graded concentrations of dietary protein with and without added urea, tumorigenesis, 1683.
Dimethyl selenide synthesis, effects of stock or purified diets on rat liver enzymes, 1577.

Disaccharidases, pregnancy and diabetes, effects in rat intestine, 504.
Dog, glucose tolerance, rate of utilization and gluconeogenic enzyme activities in the dog, influence of diet, 1465.
—, growth, body composition and blood metabolites, effects of dietary fat, carbohydrate and protein, 1452.
—, metabolism of D- and L-tryptophan, 642.
Drug metabolizing enzymes, hepatic microsomal, effect of protein-energy nutrition in growing rats, 258.
— — —, hepatic microsomal, induction by oral contraceptives in protein malnourished rats, 1569.
Duodenal nutrient infusions, effects on feeding in intact and vagotomized rabbits, 812.

E

Egg production, dietary protein and lysine effects in laying hens, 1192.
Electrolyte balance, effect of meal-feeding on adrenalectomized rats, 1791.
Endocrine organ mass, environmental temperature, diet dilution and treadmill running, effects in rats, 1314.
Energy balance, maintenance requirement of lean and obese Zucker rats, 191.
— intake, development of the abdominal fat pad in the pullet, 443.
— metabolism, selenium effects on rat growth, growth hormone and diet utilization, 702.
— restriction, effects on liver and adipose tissue enzymes and metabolism of glucose, 1329.
— —, effects on plasma insulin levels in weaned pigs, 1654.
— —, effects on voluntary food intake, body composition and endocrine organ mass, 1314.
— utilization for maintenance, and for fat and lean gains by mice selected for rapid postweaning growth rate, 1202.
— —, influence of level and type of dietary protein in rainbow trout, 1547.
Enterocyte, uptake of macromolecules on transposed and isolated piglet small intestine, 419.
Environment, effects on cholinesterase activity of brain and adrenal glands of rats, 342.
Environmental temperature, diet dilution and treadmill running effects on liver and adipose tissue enzymes and metabolism of glucose, 1329.
— —, diet dilution and treadmill running, effects on voluntary food intake, body composition and endocrine organ mass, 1314.
Enzyme activities, pancreas, digestive tract and feces of rats fed raw or heated soy flour, 300.
— —, stoppage of glycogenesis and overshoot of induction of lipogenesis in the liver of fasted-refed rats, 136.
— regulation, glucose-6-phosphate dehydrogenase and malic enzyme, control by dietary fatty acids in the starved-refed rat, 285.
Epididymal fat pad tissue cyclic-AMP, rat strain differences as influenced by glucagon, 1102.
Errata, 880.
Erythrocyte hemolysis, prevention by α-tocopherol and γ-tocopherol, 124.
—, kinetic modifications of acetylcholinesterase and $(Ca^{2+} + Mg^{2+})$-ATPase in the rat, 1827.
Essential and nonessential fatty acids in complex mixtures, effects on fatty acid composition of liver lipids, 1809.
Estrogen stimulation, ovalbumin biosynthesis, evidence that vitamin A is not required in chicks, 1515.
Ethane-1-hydroxy-1,1-diphosphonate, bone metabolism in the growing chick, 802.
Ethanol, vitamin profile of organelles in rat liver and brain, 606.
Exercise, adipose tissue cell size and lipolysis in the rat, 1351.
—, effects on liver and adipose tissue enzymes and metabolism of glucose, 1329.
—, effects on voluntary food intake, body composition and endocrine organ mass, 1314.
— endurance, dietary fat content and food intake effects in rats, 1539.

F

Faba beans, growth depressing factors, studies with chicks, 275.
— —, unprocessed, protein quality evaluation in young pigs, 350.
Fat, dietary, fluoride absorption and tissue retention in rats, 575.
—, dietary, gallstone formation, bile kinetics and plasma lipids, effects in squirrel monkeys, 1123.
—, dietary, growth, body composition and blood metabolites in the dog, 1452.
—, dietary, hepatic metabolism of oleic acid and very low density lipoprotein triglyceride in the gerbil, 1279.
—, dietary, influence of dietary inositol on glyceride composition and synthesis in livers of rats, 529.
—, dietary level, influence on the capacity of pectin in lowering serum and liver lipids of young rats, 1564.
—, dietary, running performance and other performance related parameters of rats restricted or non-restricted in food intake, 1539.
Fatty acid(s) composition of liver lipids, effect of essential and nonessential fatty acids in complex mixtures, 1809.
— — composition of phospholipids, effects of vitamin B6 deficiency, 169.
— — composition of phospholipids in the rat, effects of long-term excess of pyridoxine, 976.
— —, α-decarboxylation of leucine in skeletal muscle, 1079.
— —, development of the young rat, possible dietary essential role for linolenic acid, 86.
— —, dietary, control of glucose-6-phosphate dehydrogenase and malic enzyme in the starved-refed rat, 285.
— — metabolism, dietary fat effects in the liver of gerbils, 1279.
— — metabolism, effect of dietary vanadium in the chick, 249.
— — oxidation, relation of ketosis to metabolic changes induced by acute medium-chain triglyceride feeding in [illegible] 58.
— — patterns (postnatal) in brains of progeny from vitamin B6 deficient rats before and after pyridoxine supplementation, 1415.
— — synthesis, effect of dietary glycerol on liver and adipose tissue of rats and chickens, 1668.

Feces, enzymic activities of rats fed raw or heated soybean flour, 300.
Feeding behavior, changes in developing rats, 615.
— —, environmental temperature, diet dilution and treadmill running, effects in rats, 1314.
— —, parotid enzymes and plasma corticosterone in developing rats, 1295.
Ferritin, iron absorption by humans, 128.
Fiber, binding of various bile acids and salts in vitro, 1292.
— consumption as wheat bread, decreased absorption of calcium, magnesium, zinc and phosphorus, 493.
—, dietary, influence on serum and tissue cholesterol levels in rats, 118.
—, vegetable, adsorption of bile salts, a method, 1429.
Fish, biological value of soybeans for rainbow trout used to measure antitrypsin activity, 761.
—, dietary protein influence on feed utilization by rainbow trout, 1547.
—, dietary protein to energy ratio for channel catfish fingerlings (Ictalurus punctatus), 1368.
—, vitamin E and selenium interrelations in the diet of Atlantic salmon (Salmo salar), gross, histological and biochemical deficiency signs, 892.
Fluoride absorption, tissue retention, effect of dietary fat in rats, 575.
—, dietary, bone metabolism in the growing chick, 802.
—, essentiality for reproduction in mice, 1115.
—, mobilization of skeletal magnesium and soft tissue calcinosis during acute magnesium deficiency in the rat, 771.
— -selenium interaction in the hard and soft tissue of the rat, 451.
Folic acid, uptake and metabolism of pterylpolyglutamate by rat small intestine in vitro, 485.
Food intake, changes in diet and patterns of feeding activity in developing rats, 615.
— — regulation, duodenal nutrient infusion, effects on feeding in intact and vagotomized rabbits, 812.
— — regulation, glucose antimetabolites and hunger, (theoretical article), 143.
— restriction, adipose tissue cell size and lipolysis in the rat, 1351.
— —, heart and skeletal muscle lactate dehydrogenase, effects of early severe malnutrition, 1235.
— —, mechanism of hypoglycemia due to semi-starvation in the rat, 1557.
— —, vitamin A metabolism in rats, 569.
— —, running performance and other performance related parameters of rats, 1539.
Formaldehyde treated casein and lactalbumin, nutritive value in the diet of rats, 382.

G

Galactose elimination capacity, effect of dietary protein depletion in rats, 1492.
Gallstone formation, dietary fat, cholesterol and chenodeoxycholic acid effects in squirrel monkeys, 1123.
Gastrointestinal tract, enzymic activities of rats fed raw or heated soybean flour, 300.
— —, glutathione peroxidase, influence of dietary peroxides, selenium and vitamin E, 589.
George Raymond Cowgill, a biographical sketch, 1229.
Gerbil, dietary fat effects on hepatic metabolism of oleic acid and very low density lipoprotein triglyceride in the gerbil, 1279.
Gestation, plasma insulin levels of the pregnant pig, its fetuses and developing offspring, effects of maternal protein malnutrition, 1647.
— and lactation, *myo*-inositol metabolism in rats, 1617.
— — —, feeding lysine and threonine fortified bread, effects on growth of brain in rats, 41.
— — —, feeding lysine and threonine fortified bread, effects on growth of offspring in rats, 33.
— — —, trace mineral deficiencies in rats caused by feeding rapeseed flours during growth, 1166.
Glucagon, cyclic-AMP levels in liver and epididymal fat pad tissue, rat strain differences, 1102.
—, low protein fed to rats, effects on plasma, 1247.
—, response to administration of mannoheptulose in the rat, 68.
Glucocorticoids, intestinal absorption of phosphate in the rat, 1752.
Gluconeogenesis, effect of meal-feeding on adrenalectomized rats, 1791.
—, enzymes activities, influence of diet in dogs, 1465.
—, influence of diet, cortisol and insulin in the rat, 103.
—, lactate conversion in liver of stress-susceptible and stress-resistant pigs, 710.
—, mechanism of hypoglycemia due to semi-starvation in the rat, 1557.
—, rate from L-cysteine in the perfused rat liver, 1272.
—, response to mannoheptulose in the rat, 68.
Glucose antimetabolites and hunger, (theoretical article), 143.
—, α-decarboxylation of leucine in skeletal muscle, 1079.
— metabolism, environmental temperature, diet dilution and treadmill running effects in rats, 1329.
— —, feeding and fasting effects in chicken, 1135.
— -6-phosphate dehydrogenase, control by dietary fatty acids in the starved-refed rat, 285.
— tolerance, alteration by dietary L-tryptophan in rats, 631.
— tolerance, dietary chromium effects in guinea pigs, 1391.
— tolerance, rate of utilization and gluconeogenic enzyme activities in the dog, influence of diet, 1465.
Glutathione (reduced), changes in chick tissues during onset and regression of nutritional muscular dystrophy, 181.
—, dimethyl selenide synthesis, effects of stock or purified diets on rat liver enzymes, 1577.
— levels, dietary cholesterol effects in the rat, 94.
— —, ascorbic acid influence on selenium nutrition in the chick, 958.
— —, gastrointestinal tract, influence of dietary peroxides, selenium and vitamin E, 589.
— —, vitamin E-selenium nutrition, effects of high dietary levels of vitamin A on young and adult chickens, 967.

Gluten, repression of HMP shunt dehydrogenases, citrate cleavage enzyme and malic enzyme in rat liver and adipose tissue, 335.
Glyceride composition and synthesis in livers of rats fed different fats, influence of dietary inositol, 529.
Glycerol, lipogenic enzyme activities and fatty acid synthesis in the rat and chicken, 1668.
Glycogenesis, enzyme activities in the liver of fasted-refed rats, 136.
Glycoprotein metabolism, effect of dietary carbohydrate in rats, 555.
—, vitamin A deficiency, depressed α_1-macroglobin in rats, 1659.
Glycosaminoglycans, metabolism, effect of dietary carbohydrate in rats, 555.
— —, vitamin A deficiency in the rat, 471.
—, silicon requirement for articular cartilage and connective tissue formation in the chick, 478.
Gnotobiotics, cholesterol and bile acid metabolism, effects of dietary lactose in conventional and germfree rats, 1782.
Gnotobiotes, cholesterol synthesis in germfree and conventional rats, 1175.
Gout, purines, dietary, effects on serum and urinary uric acid in humans, 428.
Growth hormone, protein or energy restriction, effects in pregnant pigs, its fetuses and developing progeny, 940.
— —, protein or energy restriction during the postweaning period in pigs, 947.
— —, selenium effects in rats, 702.
Guinea pig, cholesterol turnover and tissue distribution in response to dietary cholesterol, 515.
— —, dietary chromium effects on glucose tolerance and serum cholesterol, 1391.
— —, superoxide dismutase activity in polymorphonuclear leucocytes and alveolar macrophages, effects of protein malnutrition, 1801.

H

Hamster, Vitamin B12 deficiency and metabolic changes, 77.
Heart lactate dehydrogenase, effect of early severe malnutrition, 1235.
Hemicellulose fractions of molasses, influence in rat nutrition, 1447.
Hemosiderin accumulation, consumption of excess dietary methionine and S-methyl-L-cysteine, growth depression and tissue reaction in rat, 1714.
—, iron absorption by humans, 128.
Hen (see Chicken)
Hepatic (see Liver)
HMP shunt dehydrogenases, repression by gluten in rat liver and adipose tissue, 335.
Hormones, α-decarboxylation of leucine in skeletal muscle, 1079.
Human, absorption, calcium, magnesium, zinc and phosphorus, increased consumption of fiber and phosphorus as wheat bread, 493.
—, creatine pool size and turnover in relation to creatine intake in men, 371.
— body composition during weight reduction, evaluation of a new model for clinical studies, 1694.
—, disparate hydration of adipose and lean tissue require a new model for body water distribution in man, 1687.
—, intestinal bioavailability of vitamin B6 from a synthetic and a natural source, 1433.
—, iron absorption from hemosiderin and ferritin, 128.
—, iron requirement of man, a conspectus of research, 985.
—, iron supplements, biological availability, 265.
—, nitrogen retention in men after feeding varying levels of amino acids from soybean protein with or without added L-methionine, 212.
—, nitrogen retention in men fed isolated soybean protein supplemented with L-methionine, D-methionine, N-acetyl-L-methionine or inorganic sulfate, 1286.
—, plasma free amino acids of children consuming a diet with uneven distribution of protein relative to energy, 241.
—, plasma free amino acids of infants consuming soybean proteins with and without added methionine, 1307.
—, protein deficiency, a Nigerian village study, 312.
—, protein quality of high protein wheats in infants and children, 362.
—, protein requirement, obligatory urinary and fecal nitrogen losses in elderly women, 665.
—, purine, (dietary), effects on serum and urinary uric acid, 428.
—, regulatory role of dietary leucine of plasma branched-chain amino acids in young men, 230.
—, vitamin C requirement of man, a conspectus of research, 821.
—, zinc bioavailability in milk and soybean protein based infant formulas, 913.
Hunger, glucose antimetabolites, (theoretical article), 143.
Hydrogen production, ingestion of raffinose, stachyose and oligosaccharide-free bean residue in rats, 466.
Hypoglycemia, mechanism due to semistarvation in the rat, 1557.
Hypovitaminosis A, effect on water metabolism in the weanling rat, 1817.

I

Infection, protein synthesis in zinc deficient rats during tularemia, 905.
—, response of immunized parenterally nourished rats to challenge with the nematode, 1484.
—, superoxide dismutase activity in polymorphonuclear leucocytes and alveolar macrophages of protein malnourished rats and guinea pigs, 1801.
Inositol, dietary, glyceride composition and synthesis in liver of rats fed different fats, 529.
myo-Inositol metabolism during gestation and lactation in the rat, 1617.
— -Inositol metabolism in neonatal and developing rats, 1610.
Insulin, low protein diets fed to rats, effects on plasma, 1247.
—, plasma levels in weaned pigs fed protein or energy restricted diets, 1654.
—, plasma levels of the pregnant pig, its fetuses and developing offspring, effects of maternal protein malnutrition, 1647.
—, pyruvate carboxylase and phosphoenolpyruvate carboxykinase activity in the rat liver, 103.

Intestine, permeability to large particles in normal and protein deficient adult rats, 20.
Immunity, challenge infection with the nematode Trichinella spiralis, of parenterally nourished rats, 1484.
—, vitamin A and undernutrition, effects on susceptibility of rodents to a malarial parasite, Plasmodium berghei, 784.
Iron absorption, hemosiderin and ferritin in humans, 128.
—, availability to the rat, monoferric phytate isolated from wheat bran, 753.
— deficiency anemic chicks and rats, effects of dietary fats on lipogenesis, 405.
—, dietary, effects on pregnancy superimposed upon growth in the rat, 543.
— requirement of man, a conspectus of research, 985.
— retention, modified and unmodified tapioca starches in rats, 1768.
— supplements, biological availability for rats, chicks and humans, 265.

K

Kanehiro Takaki, a biographical sketch, 583.
α-Keto acids and α-hydroxy acids, substitutes for phenylalanine in the diet of the growing rat, 158.
Ketosis induced by acute medium-chain triglyceride feeding in rats, 58.
—, tissue levels of ketone bodies, carbohydrate free diets fed to rats, 1507.

L

Lactate dehydrogenase, heart and skeletal muscle, effect of early severe malnutrition, 1235.
— metabolism, gluconeogenesis in stress-susceptible and stress-resistant pigs, 710.
Lactation, prevention of lactation induced fatty liver by dietary *myo*-inositol, 1617.
—, pyridoxine supplementation, vitamin B6 levels in milk of rats deficient in the vitamin, 509.
Lactose, calcium uptake in the rat small intestine, 1265.
—, dietary, cholesterol and bile acid metabolism of conventional and germfree rats, 1782.
Latin American diets, protein quality evaluation by rat bioassay, 792.
Lead toxicity, influence of dietary selenium in the rat, 778.
— —, influence of dietary zinc in the rat, 689.
Lenticular opacities in young rats as a consequence of maternal diets low in tryptophan and/or vitamin E, 222.
Letter to the editor, 1376.
— — — —, 1835.
Leucine, dietary, regulatory role on plasma branched-chain amino acid levels in young men, 230.
— metabolism, skeletal muscle, effects of starvation glucose, fatty acids and hormones in rats, 1079.
—, plasma amino acids and tissue response in young adult rats, 597.
Leucocytes, superoxide dismutase activity of protein malnourished rats and guinea pigs, 1801.
Leucocyte transketolase activity as an index of thiamin nutriture in rats, 1678.
Lignin-hemicellulose fraction of molasses, influence in rat nutrition, 1447.
Linolenic acid, development of the young rat, possible essential role, 86.
Lipid composition of yolk of developing atherosclerosis-susceptible white carneau and atherosclerosis-resistant show racer pigeon embryos, 627.
— metabolism, dietary inositol influence on glyceride composition and synthesis in rat liver, 529.
— requirement, adult lobster, Homarus americanus, 1159.
—, serum and liver, lowering capacity of pectin, influence of fat level and type of carbohydrate in young rats, 1562.
—, serum response to changes in dietary cholesterol levels in nonhuman primates, 1757.
Lipogenesis, adipose tissue changes of rats when converted from ad libitum feeding to meal-eating, 884.
—, dietary fat effects in iron deficiency anemic chicks and rats, 405.
—, effect of dietary glycerol on fatty acid synthesis in the rat and chicken, 1668.
—, over-shoot induction and enzyme activities in the liver of fasted-refed rats, 136.
Lipolysis, response to exercise intensity and food restriction in the rat, 1351.
Lipoprotein metabolism, very low density lipoprotein triglyceride secretion in the gerbil, effects of dietary fat, 1279.
—, serum responses of nonhuman primates to changes in dietary cholesterol levels, 1757.
Litter size, effect on weight gain in rats, 697.
Liver, amino acid transport in rats fed low protein meals, 1497.
— composition, polysomal profile, effects on zinc deficiency in weanling rats, 1152.
—, cyclic-AMP levels, rat strain differences as influenced by glucagon, 1102.
— dehydrogenase activities, glycogenesis and lipogenesis in fasted-refed rats, 136.
— enzymes, dimethyl selenide synthesis, effects of stock or purified diet in rats, 1577.
— —, environmental temperature, diet dilution and treadmill running effects in rats, 1329.
— function, protein depletion, effects on galactose elimination capacity in rats, 1492.
— lipids, fatty acid composition, effect of essential and nonessential fatty acids in complex mixtures, 1809.
— microsomal drug metabolizing enzymes, effect of protein-energy nutrition in growing rats, 258.
— — drug metabolizing enzymes, induction by oral contraceptives in protein malnourished rats, 1569.
—, mitochondrial oxidative metabolism and morphology during riboflavin deficiency and recovery in mice, 73.
—, mobilization and urinary excretion of vitamin A, effect of zinc and vitamin A deficiency in rats, 1773.
—, perfused, rate of gluconeogenesis from L-cysteine in rats, 1272.
—, prevention of lactation induced fatty liver by dietary *myo*-inositol, 1617.
—, pyridoxal phosphate-dependenta enzymes, stability in vitamin B6 deficient rats, 653.
—, vitamin K concentration in rats, 1747.

—, vitamin profile of organelles in rats, effects of a single intoxicating dose of ethanol, 606.
Lobster, dietary lipid requirement, 1159.
Lysine and threonine fortified bread, effect of feeding during gestation and lactation on growth of brain in rats, 41.
— and threonine fortified bread, effect of feeding during gestation and lactation on growth of offspring in rats, 33.
—, dietary, plasma amino acids, nitrogen retention and egg production in laying hens, 1192.
— ketoglutarate reductase, (degrading enzymes) adaptive response in adult rats, 1089.
—, plasma amino acids and tissue response in young adult rats, 597.
— supplementation of rice diets, relation to growth and fatty livers in rats, 111.
Lysinoalanine, alkali treated proteins, feeding studies in rats and other animals, 1527.

M

α_1-Macroglobin, plasma levels in vitamin A deficient rats, 1659.
Macromolecules, uptake by enterocytes on transposed and isolated piglet small intestine, 419.
—, intestinal permeability in normal and protein deficient adult rats, 20.
Magnesium absorption, fiber and phosphorus consumption as wheat bread, 493.
— deficiency, magnesium, calcium and zinc levels in maternal and fetal tissues, 1261.
— —, mobilization of skeletal magnesium and soft tissue calcinosis in the rat, effect of fluoride, 771.
— —, teratogenic effects in rats, 1254.
Maintenance requirement and energetic efficiency of lean and obese Zucker rats, 191.
— —, utilization of energy by mice selected for rapid postweaning growth rates, 1202.
Malic enzyme, control by dietary fatty acids in the starved-refed rat, 285.
— —, repression by gluten in rat liver and adipose tissue, 335.
Manganese, dietary, nitrogen equilibrium and mineral distribution subsequent to trauma in mature rats, 1421.
—, trace metal interactions in mouse and rat tissues, 198.
Mannoheptulose administration, gluconeogenesis in rats, 68.
Meal-feeding, lipogenic changes in adipose tissue of rats, 884.
— -feeding, response of adrenal hormones in rats, 1791.
Membrane, microsomes and mitochondria of aging rats, effects of dietary α-tocopherol, 918.
Metallothionein, metabolism of dietary zinc in rats, 1591.
Methionine and threonine, nitrogen sparing action in rats fed a protein free diet, 48.
— catabolism independent of S-adenosylmethionine, 1721.
—, dietary excess, growth depression and tissue reaction in rats, 1714.
—, dietary, influence on choline utilization in the chick, 412.
— methyl carbon oxidation, importance of sarcosine formation in the rat, 1702.
— oxidation, choline synthesis in rats, 735.
— supplementation, nitrogen retention in men fed isolated soybean protein, 1286.
— —, soybean protein, plasma amino acids of infants, 1307.
— —, vitamin B12 deficiency and metabolic changes in (golden) Hamsters, 77.
— utilization of oxidized forms of sulfur amino acids by the weanling rat, 1108.
S-Methyl-L-cysteine, dietary excess, growth depression and tissue reaction in rats, 1714.
Mice, amino acid requirement for growth, 1361.
—, fluoride essentiality for reproduction, 1115.
—, riboflavin deficiency and recovery, hepatic mitochondrial oxidative metabolism and morphology, 73.
—, trace metal interactions in mouse and rat tissues, zinc, chromium, copper and manganese with 13 other elements, 198.
—, utilization of energy for maintenance and for fat and lean gains by mice selected for rapid postweaning growth rate, 1202.
Milk vitamin B6, pyridoxine supplementation of deficient rats, 509.
— xanthine oxidase, bovine, digestion and absorption, its role as an aldehyde oxidase, 1600.
—, zinc availability in infant formulas, 913.
Mitochondria, inhibition of in vitro swelling induced by Ca^{2+} or thyroxine by feeding rats a low casein diet, 1637.
—, α-tocopherol (dietary) effects in aging rats, 918.
Mitochondrial oxidative metabolism and morphology during riboflavin deficiency and recovery in mice, 73.
Molasses lignin-hemicellulose fractions, influence in rat nutrition, 1447.
Monkey, dietary fat, cholesterol and chenodeoxycholic acid effects on gallstone formation, bile acid kinetics and plasma lipids in squirrel monkeys, 1123.
—, serum lipid and lipoprotein response of nonhuman primates to changes in dietary cholesterol levels, 1757.
Muscular dystrophy (nutritional), changes in reduced glutathione of chick tissues, 181.
Muscle metabolism, α-decarboxylation of leucine, effects of starvation, glucose, fatty acids and hormones in rats, 1079.
Myelination, *myo*-inositol metabolism in neonatal and developing rats, 1610.

N

Nephrocytomegalia, effects of alkali treated proteins, feeding studies with free and protein bound lysinoalanine in rats and other animals, 1527.
Nitrogen balance, obligatory urinary and fecal nitrogen losses in elderly women, 665.
— — subsequent to trauma in mature rats, effects of dietary copper, manganese and zinc, 1421.
— metabolism, arginine free-diet fed to gravid swine during the 84 days of gestation, 636.
— retention, dietary protein and lysine effects in laying hens, 1192.
— — in men fed isolated soybean protein supplemented with L-methionine, D-methionine, N-acetyl L-methionine or inorganic sulfate, 1286.

——in men fed varying levels of amino acids from soybean protein with or without added L-methionine, 212.
——, raw or heated soybean flour fed to rats, 292.
—sparing action of methionine and threonine in rats fed a protein free diet, 48.

O

Obesity, maintenance requirement and energetic efficiency of lean and obese Zucker rats, 191.
Oral contraceptives, induction of microsomal drug metabolizing enzymes in protein malnourished rats, 1569.
Ovalbumin synthesis, evidence that vitamin A is not required in chicks, 1515.

P

Pancreas, enzymic activities of rats fed raw or heated soybean flour, 300.
Parasitemia, vitamin A and undernutrition in rats, 784.
Parathyroid hormone (plasma) calcium kinetics in cows, 671.
Parenteral nutrition, intracellular distribution of phosphate in the underfed rat developing weakness and coma, 1398.
——, response of immunized rats to challenge infection with the nematode, 1484.
Parotid secretory enzymes, changes in patterns in developing rats, 1295.
Pectin, fat level and type of carbohydrate in lowering serum and liver lipids of young rats, 1562.
Pentose phosphate cycle, cerebral metabolism, thiamin deficiency in the rat, 1144.
Peroxides, dietary, influence of glutathione peroxidase of the gastrointestinal tract, 589.
Persulfurase activity, in livers of rats fed different levels of sulfate and cysteine, 537.
Phenylalanine substitutes in the diet of growing rats, 158.
Phenyllactic acid, substitutes for phenylalanine in the diet of the growing rat, 158.
Phenylpyruvic acid, substitutes for phenylalanine in the diet of the growing rat, 158.
Phosphate absorption, action of protein synthesis inhibitors and glucocorticoids in the rat, 1752.
—metabolism, intracellular, underfed rats developing coma following total parenteral nutrition, 1398.
Phosphoenolpyruvate carboxykinase activity, influence of diet, cortisol and insulin in the rat, 103.
Phospholipid(s), choline synthesis in the oxidation of methionine methyl group in rats, 735.
—, fatty acid composition, effects of long-term excess of pyridoxine, 976.
—, fatty acid composition, effects of vitamin B6 deficiency, 169.
Phosphorus absorption, fiber and phosphorus consumption as wheat bread, 493.
Phytate, monoferric, isolation from wheat bran and its biological value as an iron source to the rat, 753.
Pigeons, yolk lipids of developing atherosclerosis-susceptible white carneau and atherosclerosis-resistant show racer pigeon embryos, 627.
Pig, ceruloplasmin development in pigs during the neonatal growth period, 1343.
—, gluconeogenesis from lactate in liver of stress-susceptible and stress-resistant pigs, 710.
—, growth hormone levels after feeding protein or energy restricted diets during the postweaning period, 947.
—, growth hormone levels of the pregnant pig, its fetuses and developing progeny, effects of decreased dietary protein and energy intake, 940.
—, maternal protein malnutrition during gestation alone and its effects on plasma insulin levels in the pregnant pig, its fetuses and developing offspring, 1647.
—, nitrogen metabolism and reproduction of gravid swine fed an arginine free diet during the last 84 days of gestation, 636.
—, plasma adrenocorticosteroid levels in protein and energy restricted pigs, 952.
—, plasma insulin levels in weaned pigs fed protein or energy restricted diets, 1654.
—, protein quality evaluation of low-glucosinolate-low erucic acid rapeseed meal and unprocessed faba beans in young pigs, 350.
—, uptake of macromolecules by enterocytes on transposed and isolated piglet small intestine, 419.
Placental transport, ascorbic acid metabolism in the rat, 767.
Plasma amino acids, dietary protein and lysine effects in laying hens, 1192.
————, infants consuming soybean protein with or without added methionine, 1307.
————in reptiles after feeding protein or amino acids and after injecting amino acids, 1097.
————of children consuming a diet with uneven distribution of protein relative to energy, 241.
————, response to dietary leucine, lysine, and alanine in young adult rats, 597.
—branched-chain amino acids, regulatory role of dietary leucine in young men, 230.
—cholesterol, biotin requirement in rats fed 20% egg white, 1643.
—lipids, dietary fat, cholesterol and chenodeoxycholic acid effects in squirrel monkeys, 1123.
Polysomal profile, liver composition, effects of zinc deficiency in weanling rats, 1152.
Polyunsaturated fatty acids, protection from biohydrogenation in the rumen by treatment of whole fat soybeans or soy flour with formaldehyde, 1383.
Pregnancy, ascorbic acid metabolism in the rat, 767.
—, intestinal disaccharidases in the diabetic rat, 504.
—, iron requirement in the rat, 543.
—, magnesium, calcium and zinc levels of maternal and fetal tissues in magnesium deficient rats, 1261.
—, magnesium deficiency, teratogenic effects in rats, 1254.
Proceedings of the fortieth annual meeting of the American Institute of Nutrition, 1213.
Protein deficiency, adrenal function in young of protein deprived pregnant rats, 392.
——, antibiotics, effects on growth of the immature rat, 1737.
——, galactose elimination capacity in intact rats, 1492.

——, gestation, plasma insulin levels in the pregnant pig, its fetuses and developing offspring, 1647.
——, human, a Nigerian village study, 312.
——, intestinal permeability to large particles in adult rats, 20.
——, nitrogen sparing action of methionine and threonine in rats, 48.
——, oral contraceptives, induction of microsomal drug metabolizing enzymes, 1569.
——, plasma insulin levels in weaned pigs, 1654.
——, superoxide dismutase activity in polymorphonuclear leucocytes and aveolar macrophages of rats and guinea pigs, 1801.
Protein deficiency, swelling of purified rat liver mitochondria induced by Ca^{2+} or thyroxine, 1637.
—, dietary, decreased plasma insulin but normal glucagon in rats, 1247.
—, dietary, growth, body composition and blood metabolites in the dog, 1452.
—, dietary, influence on choline utilization in the chick, 412.
—, dietary level and type, feed utilization by rainbow trout, 1547.
—, dietary, plasma amino acids in reptiles after feeding, 1097.
—, dietary, plasma amino acids, nitrogen retention and egg production in laying hens, 1192.
—, dietary, tumorigenesis in rats injected with 1,2-dimethylhydrazine, 1583.
—, digestion, formaldehyde treated casein and lactalbumin, nutritive value in the diet of rats, 382.
— distribution in a diet relative to energy, plasma free amino acids of children, 241.
— efficiency ratio, water of hydration, effect in casein and soybean protein with rats, 1438.
— -energy nutrition, activity of hepatic microsomal drug metabolizing enzymes in growing rats, 258.
— -energy nutrition, cholinesterase activity of brain and adrenal glands of rats, 342.
— -energy nutrition, effects on growth hormone levels in pregnant pigs, its fetuses and developing progeny, 940.
— -energy nutrition, plasma adrenocorticosteroid levels in pigs, 952.
— -energy nutrition, postweaning, effects on growth hormone levels in pigs, 947.
— -energy nutrition, susceptibility of rodents to a malarial parasite, Plasmodium berghei, 784.
— -energy ratio for channel catfish fingerlings Ictalurus punctatus), 1368.
— intake, development of the abdominal fat pad in the pullet, 443.
— requirement of man, obligatory urinary and fecal nitrogen losses in elderly women, 665.
— synthesis, dietary cholesterol effects in the rat, 94.
— synthesis inhibitors, intestinal absorption of phosphate in the rat, 1752.
— synthesis in zinc deficient rats during tularemia, 905.
— quality evaluation of low glucosinolate-low erucic acid rapeseed meal and unprocessed faba beans in young pigs, 350.
—— evaluation, rat bioassay of Latin American diets, 792.
——, wheat (high protein) in infants and children, 362.
Purines, dietary, serum and urinary uric acid of normal, hyperuricemic and gouty humans, 428.
—, levels in foods, metabolic effects in rats, 435.
Pyridoxal phosphate-dependent enzymes, stability in vitamin B6 deficient rats, 653.
Pyridoxine (see Vitamin B6)
Pyruvate carboxylase activity, influence of diet, cortisol and insulin in the rat, 103.

Q

Quail, calcium absorption regulation independent of kidney vitamin D hydroxylation in quail, 1336.

R

Rabbit, arginine requirement, 717.
—, food intake behavior after duodenal nutrient infusions, 812.
Raffinose-free bean residue, hydrogen production in rats, 466.
Rapeseed flours, trace mineral deficiencies due to feeding during growth, gestation and lactation, 1166.
— meal, low glucosinolate-low erucic acid, protein quality evaluation in young pigs, 350.
Rat strain differences in cyclic-AMP levels in liver and epididymal fat pad tissue as influenced by glucagon, 1102.
Redox potential, concentration of ketone bodies in tissues of rats fed carbohydrate free diets, 1507.
Reproduction, arginine free diet fed to gravid swine during last 84 days of gestation, 636.
—, dilaurly succinate effect, preventive effect of vitamin E, 1184.
—, fluoride essentiality in mice, 1115.
—, teratogenic effects of magnesium deficiency in rats, 1254.
Reptiles, plasma amino acids after feeding protein or amino acids and after injecting amino acids, 1097.
Retinol (see Vitamin A)
Retinol-binding protein and retinoic acid-binding protein in rat testes, 204.
Riboflavin deficiency and recovery in mice, relationship between hepatic mitochondrial oxidative metabolism and morphology, 73.
Rice diets, carnitine and lysine supplementation, relation to growth and fatty livers in rats, 111.
RNA synthesis and nucleolar size, hepatic, effects of cycloheximide in rats force fed a threonine-devoid diet, 930.
Rumen, formaldehyde treatment of whole fat soybeans or soy flour to protect the polyunsaturated fatty acids from biohydration, 1383.

S

Saccharin, effects on sucrose consumption of rats, 388.
Sarcosine formation, methionine methyl carbon oxidation in the rat, 1702.
Selenium deficiency signs in Atlantic salmon, interrelations with vitamin E, 892.
—, dietary, effect on rat growth, growth hormone and diet utilization, 702.
—, dietary, influence on glutathione peroxidase of the gastrointestinal tract, 589.

—, dietary, influence on lead toxicity in the rat, 778.
— nutrition, ascorbic acid influence in the chick, 958.
Serine dehydratase activity, dietary cholesterol effects in the rat, 94.
Silicon requirement, articular cartilage and connective tissue in the chick, 478.
β-Sitosterol, absorption and incorporation into eggs by laying hens, 1629.
Skeletal magnesium mobilization during acute magnesium deficiency in rats, effects of fluoride, 771.
— muscle lactate dehydrogenase, effect of early severe malnutrition, 1235.
Slope-ratio assay, protein quality evaluation of Latin American diets by rat bioassay, 792.
Small intestine, calcium uptake by lactose in the rat, 1265.
— —, disaccharidases, effects of pregnancy and diabetes in the rat, 504.
— —, transposed and isolated, uptake of macromolecules by enterocytes of piglet, 419.
— —, uptake and metabolism of pterylpolyglutamate by the rat, in vitro, 485.
Soybean, antitrypsin activity as measured by biological value for trout, 761.
— flour, raw or heated, digestibility and retention of nitrogen and amino acids in rats, 292.
— —, raw or heated, enzymic activities in the pancreas, digestive tract and feces of rats, 300.
— protein, methionine supplementation, plasma amino acids of infants, 1307.
— — supplemented with L-methionine, D-methionine, N-acetyl-L-methionine or inorganic sulfate, 1286.
— — supplemented with L-methionine, nitrogen retention in men, 212.
— —, zinc availability in infant formulas, 913.
—, treatment with formaldehyde to protect the polyunsaturated fatty acids from biohydrogenation in the rumen, 1383.
Stachyose-free bean residue, hydrogen production in rats, 466.
Starch, modified and unmodified tapioca, effects on iron (^{59}Fe) retention, 1768.
Starvation, blood metabolites and glucose metabolism in the fed and fasted chicken, 1135.
—, glucose, fatty acids and hormones on α-decarboxylation of leucine in skeletal muscle of rats, 1079.
Stress, gluconeogenesis from lactate in liver of stress-susceptible and stress-resistant pigs, 710.
Strontium feeding, tissue alkaline and acid phosphatase activities in rats, 1475.
Sucrose consumption, saccharin effects in rats, 388.
— polyester, effects on cholesterol absorption in rats, 747.
Sulfate, dietary, L-cysteinesulfinate carboxy-lyase and persulfurase activity in livers of rats, 537.
— supplementation, nitrogen retention in men fed isolated soybean protein, 1286.
Sulfur amino acids, growth depression and tissue reaction to the consumption of excess methionine and S-methyl-L-cysteine, 1714.
— — —, utilization of oxidized forms by the weanling rat, 1108.
Superoxide dismutase activity, polymorphonuclear leucocytes and alveolar macrophages of protein malnourished rats and guinea pigs, 1801.
Supplement, conspectus of research on iron requirements of man, 985.
—, conspectus of research on vitamin C requirements of man, 821.
Swine (see Pig)

T

Taste, saccharin effects on sucrose consumption in rats, 388.
Taurine deficiency, bile acid conjugation, dietary influence in the cat, 1241.
— synthesis, rats fed different levels of sulfate and cysteine, 537.
Testes, effects of retinol depletion on cellular retinol-binding protein and retinoic acid-binding protein, 204.
Thiamin deficiency, pentose phosphate cycle in rats, intracerebral mechanism, 1144.
— status indicated by leucocyte transketolase activity in the rat, 1678.
Threonine deficiency, hepatic RNA synthesis and nucleolar size in rats, effects of cycloheximide, 930.
— dehydratase, (degrading enzymes) adaptive response in adult rats, 1089.
Thyroxine, inhibition of in vitro swelling of purified liver mitochondria of rats fed a low casein diet, 1637.
Tocopherol (see Vitamin E)
Trace mineral deficiencies, rapeseed flours fed during growth, gestation and lactation, 1166.
— — distribution subsequent to trauma, effect of dietary copper, manganese and zinc in mature rats, 1421.
— — interactions, fluoride-selenium in the hard and soft tissue of the rat, 451.
— — — in mouse and rat tissues, zinc chromium, copper and manganese with 13 other elements, 198.
Trauma, nitrogen equilibrium and mineral distribution, effect of dietary copper, manganese and zinc in mature rats, 1421.
Triglyceride, medium-chain and induction of ketosis in rats, 58.
Trypsin inhibition, method to analyze soybeans using rainbow trout, 761.
Tryptophan deficiency, lenticular opacities in young rats, 222.
L-Tryptophan, dietary, alteration of glucose tolerance in rats, 631.
D- and L-Tryptophan metabolism in dogs, 642.
Tularemia, protein synthesis in rats during zinc deficiency, 905.
Tumorigenesis, 1,2-dimethylhydrazine treated rats fed graded concentrations of dietary protein with and without added urea, 1583.

U

Uric acid, serum and urinary, effect of oral purines in normal, hyperuricemic and gouty humans, 428.
Urinary excretion of vitamin A in zinc-vitamin A deficient rats, 1773.
— nitrogen excretion, nitrogen sparing action of methionine and threonine in rats fed a protein free diet, 48.

V

Vagotomy, food intake behavior in rabbits after duodenal nutrient infusions, 812.
Vanadium, dietary, effect on fatty acid and cholesterol synthesis and turnover in the chick, 249.
Vitamin profile of organelles in rat liver and brain, effects of a single intoxicating dose of ethanol, 606.
— A, chronic hypovitaminosis, effects on water metabolism in the weanling rat, 1817.
— — deficiency, depressed plasma glycoprotein, α_1-macroglobin in rats, 1659.
— — deficiency, glycosaminoglycans and ascorbic acid metabolism in the rat, 471.
— — deficiency, retinol-binding protein and retinoic acid-binding protein in rat testes, 204.
— —, dietary excess, vitamin E-selenium nutrition of young and adult chickens, 967.
— — metabolism during the repletion of zinc deficient rats, 563.
— — metabolism during zinc deficiency and food and growth restriction in rats, 569.
— —, requirement for biosynthesis of ovalbumin in chicks, 1515.
— —, susceptibility of rodents to a malarial parasite, Plasmodium berghei, 784.
— — -zinc deficiency, hepatic mobilization and urinary excretion of vitamin A in rats, 1773.
Vitamin B6, brain lipid patterns (postnatal) in progeny of deficient rats before and after pyridoxine supplementation, 1404.
— — deficiency, effect on fatty acid composition of the major phospholipids in the rat, 169.
— — deficiency, stability of pyridoxol phosphate-dependent enzymes in rats, 653.
— —, dietary excess, fatty acid composition of the major phospholipids in the rat, 976.
— —, dietary, influence on certain parameters of developing and mature brains in rats, 680.
— —, fatty acid patterns in brains of progeny ot deficient rats before and after pyridoxine supplementation, 1415.
— — supplementation, milk, vitamin B6 levels of deficient rats, 509.
— —, synthetic and natural, comparative human intestinal bioavailability, 1433.
Vitamin B12 deficiency, metabolic changes in (golden) hamsters, 77.
Vitamin C, carcadian and menstrual cycle variation in baboons, 329.
— — metabolism, placental transfer in the rat, 767.
— — metabolism, vitamin A deficiency in the rat, 471.
— — requirement of man, conspectus of research, 821.
— —, selenium nutrition in the chick, 958.
Vitamin D, 24,25-dihydroxycholecalciferol activity in chicks and rats, 724.
— —, 1α,25-dihydroxycholecalciferol-like activity in a calcinogenic plant, Cestrum diurnum, in the chick, 457.
— — hydroxylation, regulation of calcium absorption independent of kidney, 1336.
Vitamin E deficiency, lenticular opacities in young rats, 222.
— —, deficiency signs in Atlantic salmon, interrelations with selenium, 892.
— —, dietary, influence on glutathione peroxidase of the gastrointestinal tract, 589.
— —, dietary, α-tocopherol on liver microsomes and mitochondria in aging rats, 918.
— —, glutathione (reduced), changes in chick tissues during onset and regression of nutritional muscular dystrophy, 181.
— —, preventive effect of dilauryl succinate on reproduction of the cock and hen, 1184.
— — -selenium nutrition, interaction of high dietary levels of vitamin A in young and adult chickens, 967.
— —, α-tocopherol and γ-tocopherol, preventing oxidative red cell hemolysis, 124.
Vitamin K requirement, liver concentration of vitamin K in rats, 1747.

W

Warfarin-resistant rats, vitamin K requirement and concentration in liver, 1747.
Water distribution, human body composition during weight reduction, evaluation of a new model for clinical studies, 1694.
— —, hydration of adipose and lean tissue in man, a new model, 1687.
— metabolism, chronic hypovitaminosis A in the weanling rat, 1817.
— of hydration, effect on the measurement of the protein efficiency ratio of casein and soybean protein with rats, 1438.
Weight reduction, assessment of human body composition, evaluation of a new model for clinical studies, 1694.
Wheat bran, monoferric phytate isolation and its biologic value as an iron source to the rat, 753.
— bread, fiber and phosphorus consumption, decreased absorption of calcium, magnesium, zinc and phosphorus in humans, 493.
—, high protein, protein quality evaluation in infants and children, 362.

X

Xanthine oxidase, digestion and absorption, its role as an aldehyde oxidase, 1600.

Z

Zinc absorption, fiber and phosphorus consumption as wheat bread, 493.
— availability, milk and soybean protein based infant formulas, 913.
— deficiency, liver composition and polysomal profile in the weanling rat, 1152.
— —, protein synthesis in rats during tularemia, 905.
— —, vitamin A metabolism in rats, 569.
—, dietary, influence on lead toxicity in the rat, 689.
—, dietary, nitrogen equilibrium and mineral distribution subsequent to trauma in mature rats, 1421.
— levels in maternal and fetal tissues in magnesium deficient rats, 1261.
—metabolism, metallothionein relationship in rats, 1591.
— repletion, vitamin A metabolism in rats, 563.
—, trace metal interactions in mouse and rat tissues, 198.
— -vitamin A deficiency, hepatic mobilization and urinary excretion of vitamin A in rats, 1773.
